

PRESS RELEASE

EarthTV has new ownership

Munich, June 6, 2012 - Media-holding Telcast Media Group and therefore also its wholly-owned project "Earth Television Network" has been subject to a reorganization. In the course of this restructuring, Nikolaus and Claudius Lohmann, have acquired with their Berlin based company Stereo 3D Experts GmbH & Co. KG all substantial assets of the Earth Television Network (including technology, offices, employees, trademarks etc.) as of 1st of June 2012.

The assets are now held by the newly found company with the new name "earth TV network GmbH" (HRB 198111 Amtsgericht München (Local Court)). The business operations of Earth Television will be continued under the commercial name "earthTV" to make the transition as easy as possible. The address and all other contacts in Munich remain the same.

Said Nikolaus and Claudius Lohmann: " We are thrilled to be in a position to build on the achievements of earthTV to date. We have some exciting new ideas which we will announce in the weeks to come."

With the support of Bagel Group, the Lohmann brothers successfully founded Stereo 3D Experts in mid 2011. Since then, the Berliner start-up company has developed ambitious software solutions for the new 3D smartphone and 3D connected TV markets.

Both companies will continue to operate independently in the future. However, a collaboration is planned in online and mobile marketing.
